

Soft, sinuous lines flow together to form the Glove bed, made with a supporting frame in steel, covered in foam rubber. The crosspieces connecting the guides of the bed can support single or divided mattress-bases, and the height of the base can be adjusted. Glove is completed with two types of slipcovers, padded with hypoallergenic fibre, that fasten magnetically to the back of the headboard.

## Available finishes

**Bed:** fabric, leather

**Housse:** fabric, leather

## Materials

### Interior structure

Metal framework with elastic straps.

### Structure padding

Multi-density polyurethane foam. Cover made in doublelayer velveteen.

### Housse

Insert made in hypoallergenic polyester fibre with a 100% cotton cover. Magnets allow perfect positioning.

### Feet

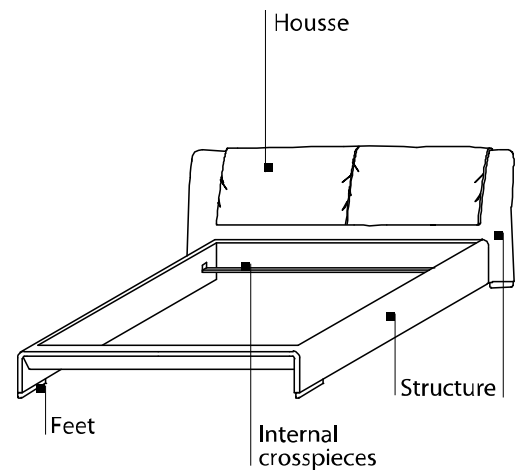

Shiny aluminium finish with foot base covers in non-slip plastic.

### Internal crosspieces

Varnished metal.

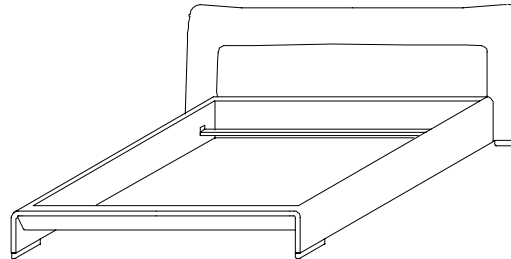

### Mattress-base spacer

Plastic.

## Types

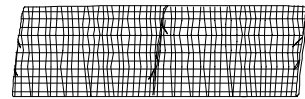

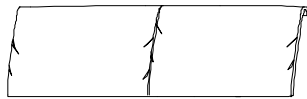

Beds  
taking double  
mattress-bases  
and two single  
mattress-bases

Housse

## Use and maintenance

This product is intended for domestic use. Do not stand on the bed runners. Avoid maintenance of product components and contact the retailer for all needs. Normal use results in compression of the padded parts during the average lifespan of the product. Do not place the product close to heat in excess of 45°C. Unusual smells emitted by the product when unpacked do not present a hazard and will disappear when placed in an aired room.

### Foot care

For ordinary care, use a soft, dry cloth to remove dust. For greasy dirt (fingerprints), we recommend the use of standard glass-cleaning detergents containing ammonia. Once a month, treat the surfaces with metal cleaner/polish. Avoid products containing solvents and/or spirits and cloths with hard fibres (synthetic/linen) as they could ruin and/or scratch the surfaces.

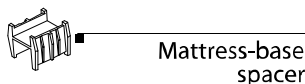

### Maintenance - Covers

See covers information sheet (in the download section on the web site [www.molteni.it](http://www.molteni.it)).

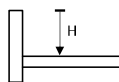

### Adjustment of mattress-base height

It is possible to adjust the height of the mesh springs by using the appropriate spacers. Before positioning the mesh springs, make sure that all the spacers have been correctly positioned.

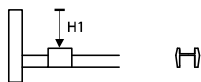

Mattress-base height adjustment		
Without spacer	H	9,5
With spacer (1)	H1	7,5
With spacer (2)	H2	5,5

With spacer (2)

### Disposal

When no longer needed, the product and its components must be taken to public waste disposal sites and not discarded in the environment.
