Seat: h. 47 cm / 18^{1/2}” from ground

Arms: h. 65 cm / 25^{5/8}” from ground

Use and maintenance

The product was designed for domestic use; never stand on a chair; avoid doing maintenance on the components of the product yourself, contacting your retailer if anything goes wrong. The chair should be used only after you make sure that all four of its legs are resting on the floor. Normal use of the product brings about a flattening in the upholstered parts during the average life of the same. Any odours given off by the product when unpacked are not toxic and disappear when exposed to aired surroundings.

Maintenance of wooden and metal parts

These parts should be cleaned using white spirit diluted with water and dried immediately with a soft cloth. This must be done carefully to avoid scratching the surface. Exposure to direct sunlight may alter the colour of the wood. Avoid products containing acetone, ammonia, chlorine, solvents, abrasive products and furniture wax.

Maintenance - Covers

See covers information sheet (in the download section on the web site www.molteni.it).

Disposal

Once discarded, neither the product nor its components should be abandoned in unauthorised areas.
