

A varied series of bedroom storage units in wood, characterised by painted side inserts and frosted glass tops in nuances of colour that allow customers to create clear contrasts between frame and drawers, and also monochromatic units. Two versions of the base are available: the traditional floor standing base and the metal base which draws attention to the slender lines.

Of the many finishes, the open grain lacquer is particularly suited to the latest offers presented for the bedroom area such as wardrobes and beds.

Molteni Design Team

Molteni Design Team is at the technological heart of Molteni&C, and has always been at the centre of the company's research and development projects. The Centre conducts research into the avant-garde materials, mechanisms and mechanical movements which make Molteni&C products unique both for their design and for their reliability in time, two guarantees of Molteni quality. More than ten highly specialised technicians now work in the wood and the soft furnishings departments. Along with research geared towards quality mass production of Molteni designs, the Team has designed and built a series of systems, furnishings and soft furnishings, unique in their severe look and functional precision. Among these are the table *Rialto*, the series of beds *Twing*, the small armchairs *Clipper* and *Francine* and the innovative *Gliss5th*, the system which has revolutionised the traditional world of wardrobe.
